SOLAR TOUR AND WORKSHOP SERIES

Every fall the SCSC presents its annual Solar Tour and Workshop Series. This two part series offers South Carolina residents and businesses the opportunity to attend local workshops and self-guided tours throughout the state giving attendees a hands-on approach as they explore solar technology.

The local workshops provide educational and demonstration opportunities necessary to understand the benefits, applications and incentives for photovoltaic energy and solar thermal systems.

The self-guided, regional tours exhibit the benefits and the process of installing solar power in your home or business.

ABOUT SCSC:

The South Carolina Solar Council (SCSC) is a state chapter of the American Solar Energy Society (ASES), a nationwide nonprofit organization dedicated to increasing the use of solar energy, energy efficiency and other sustainable technologies in the United States.

SCSC was established in 2003 to promote the wide utilization of solar energy through solar energy education and demonstration of solar energy technologies, and to serve as a resource for South Carolina residents.

SCSC continues to increase public awareness of solar technologies, advocate for better laws and regulations, improve net metering and interconnection standards, and pave the way for a more sustainable South Carolina.

Photovoltaic Power Systems

generate energy that can power home and business electricity needs. Excess electricity may be sold back to your utility company for credit on your bill.

Passive Solar Techniques

have applications for both domestic and commercial usage and reduce energy consumption.

Solar Water Heaters

typically save homeowners more than 20% annually on utility bills and have a payback period between 3 to 7 years.

In one of the fastest growing sectors of the economy, more than 200,000 homes in the United States use solar power.

With a developing infrastructure for solar energy in SC, the opportunities for a solar manufacturing sector increase as residents embrace the technology.

WHY JOIN SCSC?

- The South Carolina Solar Council will keep you informed about the latest in solar energy advancements, costs, incentives, workshops, and much more.
- Quarterly meetings are hosted around the state and a quarterly newsletter is sent to all SCSC members.
- Members may vote for SCSC board members and will be invited to attend special events and tours.
- Joining the SCSC is a great chance to network with others who are interested in solar energy and connect with solar professionals.
